Skills

▪ Flutter ▪ Dart ▪ REST API ▪ Docker ▪ Git ▪ Github CI/CD ▪ MySQL

▪ confident user of Linux ▪ TCP/IP

Work experience

June 2024 – February 2025

- Position: **Flutter developer**
- Company: ЦПКБ по Лифтам
- Tasks: Developed an application for managing and debugging UL-R elevator cabinets

Personal projects

1. **TypeDasher** - Laravel website for improving typing speed. Includes authentication, the ability to practice with selected texts, and progress tracking.
   - https://github.com/yager008/type-dasher

Technologies: PHP, Laravel, REST API, Blade, JavaScript, bootstrap, tailwind, MySQL, Docker, Github CI/CD, SMTP, Linux administration

2. **FastNotes** - Chrome browser extension for creating notes with timestamps. Notes are securely saved within the Windows operating system to the desired files (convenient to use with Obsidian).
   - https://github.com/yager008/fast-notes

Technologies: JavaScript, chrome.extension API, Python

3. **BomberGuys** - Classic Bomberman game as a plugin for UE5.3. It can be used as a foundation for developing third-person multiplayer arcade games. The plan is to turn this project into a full framework, allowing players to create their own game modes.
   - https://github.com/yager008/bomber-guys-plugin

Technologies: UE5.3, Blueprints, Replication, UE RPC, Linux administration

About me

20-year-old third-year student at BMSTU, actively seeking a job in my field.
